Q2 B>

2. Simple Static Web page.

TASK : CI and CD

- Write the code in Visual Studio and push it to your GITHUB repository.
- Modify the code and commit the updates back in GITHUB.
- Using Jenkins configure the job as pipeline and create the stages for the CI and CD process.
- Containerize the application using Dockerfile and display the stages in stage view in Jenkins.
- Create kubernetes cluster and visualize the deployment in the given node port.

a. The student results

b. Create some five events during Rivera.

c. The Conference information and its full details.

d. The price list of the items

e. The timetable of a student.

Created a code folder and files in vscode and pushed on GITHUB
